**(Co-)Sponsored by:****CFPart for WiOpt'2008****Berlin, Germany****Conference: April 1-3, 2008****Workshops: March 31 & April 4, 2008****Scope**

This symposium intends to bring together researchers and practitioners working on optimization of wireless network design and operations. It welcomes works on different perspectives, including performance analysis and simulation, protocol design, numerical communication and optimization theory, for all forms of wireless networks: cellular, wide, metropolitan, local and personal-area networks, dense and sparse ad-hoc networks, domain specific vehicular, public-transport as well as application-specific sensor networks, as well as any combination of these.

**Adjunct Workshops**

Several one-day workshops will accompany the main WiOpt symposium:

- **WiNMee/WITMeMo 2008** : International Workshop On Wireless Network Measurement
- **RAWNET 2008** : Resource Allocation in Wireless Networks
- **SPASWIN 2008**: Spatial Stochastic Models for Wireless Networks
- **WNC^3 2008** : Wireless Networks: Communication, Cooperation and Competition
- **PHYSCOMNET 2008**: Physics inspired Paradigms for Wireless Communications and Networks
- **WMCNR 2008** : Wireless Multihop Communications in Networked Robotics

**Program:**

The detailed technical program can be found on <http://www.wiopt.org>.

The conference also features keynote talks:

**Ralf Kötter, TU Munich**

**Slawomir Stanczak, TU Berlin**

**Karl Johansson, KTH**
